Remote Patient Monitoring Specialist (USRN)

Description

The Remote Patient Monitoring Specialist oversees the day-to-day operations and providing remote support for the well-being and safety of the client. Collaborating closely with families, physicians, nurses, healthcare professionals, pharmacists, and external vendors, the specialist ensures the seamless and effective care of the client. Responsibilities include conducting daily client care assessments, delivering regular written and verbal reports, addressing client needs promptly, and maintaining accurate health records.

Responsibilities

- Observes and reports patient telehealth alerts triggered by biometric data, health surveys (added 7/21/21), trend analysis and patient call request to assigned clinical contacts.
 - Collaborates with the member/patient, family, physician, and all members of the healthcare team, internal and external to this organization.
 - Interacts with the member/patient, family, physician, and healthcare team. Utilizes the predefined protocol process to set priorities, plan, organize, and implement interventions that are goal directed toward self-care/long term care outcomes, and the transition to stabilization or independent status. Exudes positive supportive energy, connects with people on a personal level and is comfortable and relaxed while practicing active listening.
 - Encourages client/member/patient participation and compliance in the clinical program efforts.
 - Documents accurately and comprehensively based on the standards of practice and current organization policies.
 - Interacts and communicates, telephonically, using video, or other technologies to be developed, striving for continuity and efficiency as the member/patient is managed along the continuum of care.
 - Performs care management responsibilities as per customer requirements; recognizes urgent situations and escalates issues appropriately
- Department Administration & Supply
- Assist with admissions, discharges, and transfer, as directed
 - Report all incidents and accidents immediately pre-defined contacts and parties
 - Coordinate personal care services for all Clients
 - Keep the working environment neat, clean, and organized at all times
- Other Duties:
- Perform other duties as assigned.
